7 CUBIC METER CONCRETE MIXER

The mixer drum is locally made where the shell and blades are fabricated from special high resistant mild steel which has a higher surface hardness. The superstructure technology has origins from Australia and Europe and the agitator (Blade) applies special anti-wearing steel with special mould shape to ensure three-dimensional mixing function that makes excellent work for concrete mixing and quick unloading.

Specification

TRUCK MODEL	NISSAN CW510 24 TON GVW
OVERALL LENGTH (MM)	8350
WHEELBASE OF TRUCK (MM)	3980 + 1300
ENGINE HORSE POWER	295HP
TRANSMISSION	MANUAL GEARBOX WITH 7 FORWARD GEARS
BRAKE SYSTEM	DUAL CIRCUIT HYDRAULIC
TYRE SIZE	11.00 x 20.00 x 16PR/12 R22.5
DRUM SIZE	8 CUBIC METER
UNLADEN WEIGHT	12000KG c/w DRUM
CARRYING LOAD CAPACITY	12000KG
